

Real-time Voice Translation: **Only from Duetta, by MDO**

Duetta connects between your phone system and the call participants, translating each side's speech in real time. Each party speaks naturally in their own language, and Duetta handles the rest! Instantly, accurately, and without extra hardware or setup.

- Real-time, bidirectional voice translation
- Supports English, Spanish, and 13 other common languages
- No extra hardware required
- Quick and easy integration with existing phone systems
- Ultra-low latency and enterprise-grade reliability
